

NEW SIDEWINDER SCOPE

Hawke Optics, the world leader in quality sporting optics, has launched a whole new level of feature-driven riflescope performance with the redesigned Sidewinder line. Hawke's best-selling line of scopes are now better than ever, ensuring outstanding accuracy from every angle and for any shooting discipline.

Available in First Focal Plane (FFP) and Second Focal Plane (SFP), every Sidewinder model has a 30mm main tube and is loaded with Hawke's new H5 optics that bring you an ultra-wide 24° field of view. Enjoy the comfort, accuracy and speed you can only get from four-inches of eye relief. The low-dispersion, high-grade Crown glass is 18-layer multicoated and in a significantly lighter and more robust construction than the outgoing model. Also new are the resettable, precision locking turrets with 1/10 mrad clicks and a Witness Window to provide instant visual confirmation of your turret position. This provides peace of mind and helps to eliminate second guessing on longer shots. You can tighten up your sight window with the index-matched, removable side wheel focus adjustment and keep your eye on the target while adjusting the zoom with the removable, magnification throw lever.

Sidewinder reticles are illuminated with a new high-intensity, adjustable multi-LED system for accuracy in every lighting condition, and tune things in with the fast-focus eye bell that has a lock ring. The Second Focal Plane Sidewinder Riflescope models include the 4.5-14 x 44 SF with a 10x half mil reticle, the 6.5-20 x 44 SF with a 20x half

mil reticle, 4-16 x 50 SF with the SR Pro II reticle, the 4-16 x 50 SF with 10x half mil reticle, 6-24 x 56 SF and 8-32 x 56 SF, both with a 20x half-mil reticle. There is also a 6-24 x 56 SF and 8-32 x 56 SF model, both with the SR Pro II reticle. There are two First Focal Plane models, the 4-16 x 50 SF and 6-24 x 56 SF, each with the FFP half mil reticle.

All of the Sidewinder models are shockproof, waterproof and dustproof, and are fully nitrogen purged. Additionally, Sidewinder models are all-caliber rated, so they can withstand the harshest recoil. Need further proof that the new 2020 Sidewinder Riflescopes from Hawke Optics are the best choice for you? They are all backed by the Hawke No-Fault Lifetime Warranty.

NEW! FLIKSHOT AIR TARGET

New and Improved! Flikshot Air from UK ShootWarehouse. The ultimate air pistol and rifle self-righting aluminium shooting target.

Have hours of fun and hone your shooting skills with this hi-visibility walking target made from a durable solid aluminium. Features 4 x double-sided target faces and 24 target stickers to keep your targets looking smarter for longer. Designed and Made in England and costs just £10!

TOP OF THE CLASS

Highland Outdoors announces a new European distribution partnership with TIER-ONE, from 1st January 2021. Recognised for manufacturing 'ultimate shooting products for any environment', TIER-ONE is a UK company globally renowned for 'engineering without compromise'. TIER-ONE was incorporated early in 2008 due to a gap in the market for 5 axis, CNC-machined, high precision rifle shooting equipment. This quickly grew into a full array of high quality accessories: optic mounts, moderators, bipods and more. Our mission statement is: We make the best possible shooting accessories from the best materials using the best components available, or not at all.

We are very excited to be working alongside Craig and Caroline at TIER-ONE and have made a big commitment to carrying a comprehensive range of stock for all markets as well as working on targeted pricing strategies." John Bright MD.
